

Soundcast (selected markets)

Wireless audio made simple

Finally! Listen to your iPod® or any MP3 player or music files of any kind through real audio equipment. No wires. No static. No interference. No Software... just plug-and-play.

Soundcast forms a wireless bridge between an audio source like an MP3 player and an audio sound system - no wires to run, no programming required - it's the perfect solution to that installation issue that has you stumped.

Soundcast Systems has developed a line of products incorporating a unique 2.4GHz wireless audio technology. For years, wireless solutions and wireless speakers have been plagued with outside interference from other products using the crowded 2.4GHz band. The Soundcast engineering team has refined our wireless audio technology to the point where the microwave oven or the cordless phone will not affect the quality of musical listening experience anywhere in the home. No buzzes, no dropouts, no distortion - just pure clean sound!

WHAT HI-FI?
SOUND AND VISION

"Clever wireless music system [and] works well...

it'll also go loud - really, really loud...

fun? Oh yes."

T3 ★★★★★

"This wonder goes silly loud."

T3 - March 2008

OutCast

ENJOY MUSIC WIRELESSLY IN THE GREAT OUTDOORS

OutCast is a wireless weather resistant outdoor speaker system designed to provide high performance full-range music in the garden or patio. Place the OutCast in the garden and it will wirelessly connect to the included iCast or other Soundcast transmitter.*

Features

- Powerful 100 watt digital amplifier
- Range up to 100metres (outdoors)
- Four high frequency drivers in an omni-directional array
- 203mm (8") downward-firing woofer
- Water resistant design - ideal for the unpredictable British weather
- Up to 10 hours use on the built-in, rechargeable battery pack
- OutCast has an internal AC power supply that can recharge the NiMH battery pack and simultaneously operate the OutCast
- Buttons for pause/play and track forward/track back for remote iPod® operation
- Controls for volume, on/off, and mood lighting
- Input jack for direct connection of an MP3 player or other compatible device

*Now available without iCast Transmitter
