The Systemline Media Interface

Caution: Your guests may find it hard to leave

The Systemline Media Interface

A single, simple connection panel for all your guest's devices.

Guests can plug in their personal devices:

- Laptop
- MP3 Player
- Games Consoles
- HD Connections - PS3/Camcorder
- Camera

Why not give your guests that "Home from Home" experience they expect?

Hotel guests, more than ever before, travel with a multitude of personal electronic items such as laptops, iPods, portable games machines and mobile phones. The growing expectation guests have is to simply charge and connect these devices to the hotel television, enabling access to their own music content, movies and games.

Whether staying for business or leisure, your guest does not have the luxury of time to understand complex devices and instructions, they require an effortless 'plug and play' solution, that will enhance the overall experience of their stay. The Systemline Media Interface has been designed to be such a device.

The Systemline Media Interface, enables complete integration of guests' personal electronic devices via a stylish in-wall panel. It then links via a single HDMI cable to the existing Hotel TV system. It's as simple as that.

Designed and developed by Systemline, the UK leaders in multi-room entertainment systems, the Systemline Media Interface is the result of extensive research by Armour Hotel a division of Armour Group PLC, a company with over 30 years experience in the consumer electronics market.

Business and Pleasure

For today's business traveller, the ability to connect their laptop to email and internet is a necessity. The Systemline Media Interface makes this process simplicity itself, it is even possible for users to connect their laptop's video and audio connections to the hotel room's own television; so when their work is done, they can enjoy a film or listen to music they have already stored on their laptops.

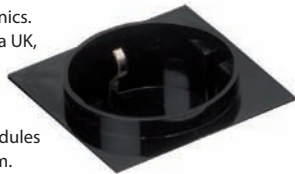

The Systemline Media Interface is also the ideal solution for Board and Conference rooms.

Simple Connectivity

Flexible Power options

The Systemline Media Input plate can accommodate Euro data modules from the likes of MK Electronics. Two blanking modules allow for fitting of a UK, Euro or 110 US style power sockets into isolated back boxes, adding flexibility for your international hotel guests. Alternatively the plate can house data modules for computer networks into the hotel room.

Audio Jack Input

Allows guests to connect any device that has a headphone socket or line output to the room's audio system - including iPods, MP3 players and Laptops.

Source Selector

Guests can switch between any connected source via the push button switch. A backlit led light identifies which connection is currently being used.

Audio, Video and HDMI Input

Your guests can take full advantage of their room's TV by connecting DVD players, PlayStation®, Xbox® and digital video cameras using these inputs.

VGA Input

This port allows the guest to enjoy the content of their laptop on the larger TV screen in their room.

USB

This USB power port gives your guests a convenient way to re-charge mobile phones, iPods and other portables.

Making the connection

Our optional cable kit provides all the cables your guests need to plug into the Media Input plate. Supplied complete in a unique box.

Branding Options

The Systemline Media Interface can be customised to reflect your individual brand or corporate identity.*

*Minimum order required.

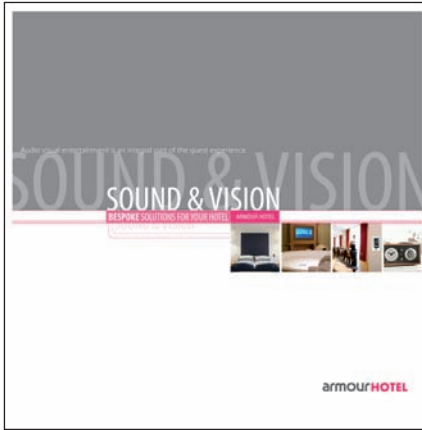

Simple to install

Simple and easy to install – reducing downtime on your hotel rooms, the media plate has been developed with a scratch proof design and comes with a two year product warranty. The plate conforms to UL, CE & FCC certifications.

The Systemline Media Input plate can be easily mounted into the wall of a hotel room, or even a piece of furniture, both options concealing the wiring. For furniture options, we recommend "The Wall" - bespoke AV Hotel furniture which can house the input plate together with an in-wall iPod docking station and the latest in-room entertainment solutions.
